adventure for fans of Becky Chambers and Ann Leckie
from the multi BSFA award-winner, Gareth L. Powell.
Seventy-five years from today, the human race has
been cast from a dying Earth to wander the stars in
a vast fleet of arks—each shaped by its inhabitants
into a diverse and fascinating new environment, with
its own rules and eccentricities. When her sister
disappears while responding to a mysterious alien
distress call, Eryn insists on being part of the
crew sent to look for her. What she discovers on
Candidate-623 is both terrifying and deadly. When
the threat follows her back to the fleet and people
start dying, she is tasked with seeking out a
legendary recluse who may just hold the key to
humanity's survival. Gareth L. Powell's *Embers of
War* won 2018 BSFA Award for Best Novel and was
shortlisted for the 2019 Locus Awards and the 2021
Seiun Awards in Japan. Its sequels, *Fleet of Knives*

Twist when they were called upon to investigate a burglary. After that, Charles Dickens forgot about them. Now they are back. Tales of the Black Lion is a novel in stories, all featuring the two private investigators. Blathers and Duff center their activities at the Black Lion Inn. Their capers involve missing jewelry, political intrigue, cryptic messages, criminal gangs, white slavery, and murder, murder, murder, murder. The detectives and others, including Charles Dickens and one of his associates, work together to solve the mysteries surrounding these issues, beginning with a bloody murder that remains unsolved until the final tale in the book. Along the way we meet characters from all levels of British society in the days of Robert Peel and the changeover from Bow Street Runners to Bobbies and London's Metropolitan Police. Covers: standards development projects, testing projects, software development and deployment projects, education and training activities and communication activities. Glossary. Charts and tables. You can dispose of a person to silence your sins, but just because you take their voice, doesn't mean you're off the hook. A dirty secret will still remain. The halls of this nightmare will awaken and the dead will speak. Vengeance, revenge and rage only lead down a one way path; to a total blood bath. In this instalment, (the prequel to Sarah) skeletons will be revealed and monsters will be shaped ready for the final chapter to this trilogy. Pearls and Pitfalls in Head and Neck and Neuroimaging illustrates and describes the imaging entities that can cause confusion and mismanagement in daily radiological practice. Frequent interpretation errors are covered in 105 cases that provide real-life clinical scenarios for focused and practical learning. The chosen cases represent a modern neuroradiology practice and cover the brain, spine and head and neck regions, including the full panoply of imaging modalities. The underlying reasons for common mistakes are analyzed and radiologic findings that help with the correct diagnosis are emphasized. A differential diagnosis is provided for each case with examples of alternative diagnoses, allowing readers to visually grasp the differentiating features. Pearls and Pitfalls in Head and Neck and Neuroimaging provides a valuable resource for general and sub-specialist radiologists needing to improve their diagnostic proficiency in adult and pediatric patients. This book also serves as a preparation resource for recertification exams in radiology. pounding voice in his head calling for "the flame." This course on field theory is the first semester of the year-long graduate algebra course here at NMSU. In the back of my mind, I thought it would be nice someday to write a book on field theory, one of my favorite mathematical subjects, and I wrote a crude form of lecture notes that semester. Those notes sat undisturbed for three years until late in 1993 when I finally made the decision to turn the notes into a book. The notes were greatly expanded and rewritten, and they were in a form sufficient to be used as the text for Math 581 when I taught it again in the fall of 1994. Part of my desire to write a textbook was due to the nonstandard format of our graduate algebra sequence. The first semester of our sequence is field theory. Our graduate students generally pick up group and ring theory in a senior-level course prior to taking field theory. Since we start with field theory, we would have to jump into the middle of most graduate algebra textbooks. This can make reading the text difficult by not knowing what the author did before the field theory chapters. Therefore, a book devoted to field theory is desirable for us as a text. While there are a number of field theory books around, most of these were less complete than I wanted.

The Hawks Trilogy ?????? Three books in one. A page-turning, sword-fighting fantasy adventure for middle grade and up.

Book 1: Rebels of Halklyen ?????? A dark sorcerer, a corrupt king and a hidden village of rebels. Assassins are not always the bad guys. In Abbarkon, it is best to keep your head down and your guard up. As long as he can remember, 14-year-old Flint has done exactly that. He ignores both the whispers of a monster named Martokallu and the rumours of a rebel group assassinating high-born dukes. Those stories mean little to him as he washes dishes and scrubs floors. On the one day that Flint breaks his own rule to defend a friend, his master ends up dead. Accident or not, Flint is sentenced to death. Hearing of his exploits, the Hawks rescue him from the executioner and whisk him away to the hidden village of Halklyen. Experts with their blades and bows, the rebels are the true defenders of the kingdom. They give Flint a sword and teach him how to use it. Before long, Flint learns that the dark sorcerer, Martokallu is real. When the Hawks are forced into the open, Flint is ready to join the fight. Will the Hawks be strong enough to win against an army of Martokallu's Followers?

Book 2: The God Sword ?????? The dwarves guard a secret. The Hawks must prove they are worthy. The Kingdom of Abbarkon is safe. There is a new king and Martokallu is dead. Or is

he? If he returns, the Hawks will need the God Sword. In search of the fabled weapon, Flint and Fleta join the Hawks on a trek through the Dwarven Kingdom of Tsaralvia. Along the way, they discover an unsettling truth: the Protectors of the God Sword do not want them there and they will do everything in their power to stop them. If the Hawks hope to save Abbarkon, they must prove they are worthy of the blade. Book 3: The White Wolf ?????? The Hawks thought the war was over. A mad sorcerer, a barbarian horde and the elven army think otherwise. Thousands of barbarian warriors from the frozen land of Nairt'kun arrive in Abbarkon's north while an elven army prepares to attack from the south. Among the northern raiders is Venadis, a young slave girl. Her masters fear her beast-shifting magic and force her to wear an iron collar. Intent on freedom, she slips away from the blood-thirsty horde and with her healing powers, she earns a place in the Hawks. When Flint, Fleta and the others head south on a mission to assassinate the elven emperor, she goes with them. The elves must be stopped. Will the Hawks get there in time to change the course of the war?

Mother and son authors, Paula Baker and Aidan Davies team up to tell the action-packed adventures of the Hawks. Perfect for fans of J.R.R. Reveals how the only hard evidence that dates the Great Pyramid--the quarry marks discovered by Colonel Vyse in 1837--was forged • Includes evidence from the time of the discovery of the marks: Vyse's private field notes, surveys, facsimile drawings, and eye-witness testimony • Explains why Vyse was driven to perpetrate a fraud inside the Great Pyramid • Examines recent chemical analysis of the marks and high-definition photos to reveal errors and other anomalies within the forged Khufu cartouche Despite millennia of fame, the origins of the Great Pyramid of Giza are shrouded in mystery. Believed to be the tomb of an Egyptian king, even though no remains have ever been found, its construction date of roughly 2550 BCE is tied to only one piece of evidence: the crudely painted marks within the pyramid's hidden chambers that refer to the 4th Dynasty king Khufu, discovered in 1837 by Colonel Howard Vyse and his team. Using evidence from the time of the discovery of these "quarry marks"--including surveys, facsimile drawings and Vyse's private field notes--along with high definition photos of the actual marks, Scott Creighton reveals how and why the marks were faked. He investigates the anomalous and contradictory orthography of the quarry marks through more than 75 photos and illustrations, showing how they radically depart from the established canon of quarry marks from this period. He explains how the orientation of the Khufu cartouche contradicts ancient Egyptian writing convention and how one of the signs is from a later period. Analyzing Vyse's private diary, he reveals Vyse's forgery instructions to his two

assistants, Raven and Hill, and what the anachronistic sign should have been. He examines recent chemical analysis of the marks along with the eye-witness testimony of Humphries Brewer, who worked with Vyse at Giza in 1837 and saw forgery take place. Exploring Vyse's background, including his electoral fraud to become a member of the British Parliament, he explains why he was driven to perpetrate a fraud inside the Great Pyramid. Proving Zecharia Sitchin's claim that the quarry marks are forgeries and removing the only physical evidence that dates the Great Pyramid's construction to the reign of Khufu, Creighton's study strikes down one of the most fundamental assertions of orthodox Egyptologists and reopens long-standing questions about the Great Pyramid's true age, who really built it, and why. Two hundred thousand years on from when the humanoid Europeans were ruled by tyrannical religious group, the Sect, in an undersea city, Earth becomes the battleground as Europa's sentient robots and the Sect's descendants collide in the final battle of their eons' long war. 'Europa is the page-turning finish to The Last Stop Trilogy. Central to the story is a deep existential dilemma: facing annihilation, would you choose to download your conscious into a computer to survive? After achieving immortality, would you give it up to become humanoid again? Burnam weaves this theme into a heart-warming, intergalactic love story where the action never stops.' Robert D. Zanger, Founder of the Albert Hoffman Foundation for Consciousness Research. The third and final instalment of The Last Stop Trilogy. Reports, Documents, and Journals of the U.S. Senate and House of Representatives.
