College Admission is the ultimate user's manual and go-to guide for any student or family approaching the college application process. Featuring the wise counsel of more than 50 deans of admission, no other guide has such thorough, expert, compassionate, and professional advice. Let's be honest: applying to college can be stressful for students and parents. But here's the good news: you can get in. Robin Mamlet has been dean of admission at three of America's most selective colleges, and journalist and parent Christine VanDeVelde has been through the process first hand. With this book, you will feel like you have both a dean of admission and a parent who has been there at your side. Inside this book, you'll find clear, comprehensive, and expert answers to all your questions along the way to an acceptance letter:

- The role of extracurricular activities
- What it means to find a college that's the "right fit"
- What's more important: high grades or tough courses
- What role does testing play
- The best candidates for early admission
- When help from parents is too much help
- Advice for athletes, artists, international students, and those with learning differences
- How wait lists work
- Applying for financial aid

Bookstore shelves are crowded with books offering advice to college students, yet—astonishingly—none of these books offer needed advice to the majority of college students in the United States ... those attending community college. Of the approximately 21 million full- and part-time college students, 11 million attend community colleges. The Community College Guide aims to help fill this huge gap. The authors of this book have decades of experience between them as professors and administrators in both two-year and four-year colleges, have written numerous books for a general readership and thoroughly understand what community college students need to know to succeed in their college careers. From how to apply to community colleges to what to expect from your courses, from the truth about what you'll pay to actual financial aid opportunities, The Community College Guide offers a wealth of information for the millions of American students who desire higher education at the community level. Demystifying the process of

completing a college application

Written by two former admissions officers at top universities and current admissions coaches, this book is a must-have for preparing a winning college application. The authors reveal the mystery behind what college admissions officers are looking for and show applicants how to leverage their credentials, stand out in the over-crowded applicants' pool, and make a genuine, memorable impression. This is the book that will help the college-bound get off the "like many others" pile and onto the acceptance list. Includes instructions and examples for every component of the college application, from writing the essay to answering questions like "Why do you want to go to College X?" Shows how to avoid underestimating the importance of critical features on any application Includes the latest information on the Common Application 4.0 and corrects outdated, holdover advice still stressed in many other books This book is filled with step-by-step advice that students and parents can use immediately and will refer to again and again. With so many qualified applicants, competition for college admissions is fiercer than ever. Now you can put yourself ahead of the pack by making your application flawless! When applying for college, good grades and high standardized test scores are not always enough to guarantee admission. What sets you apart, argues Michele Hernández, is the way you describe yourself in your application. But how do you present yourself with flair, and highlight all your talents, skills, and passions, in just a few pages? A former assistant director of admissions at Dartmouth College, Dr. Hernández takes you step-by-step through the entire application process, revealing the details that make or break an applicant. From the multitude of short and longer essays to the myriad of charts, lists, and personal data sections, she offers essential advice, useful anecdotes, and vivid examples. Included are:

- A line-by-line look at the common application
- The truth about the essays, with samples of those that made the grade
- The best way to ask for teacher and guidance counselor recommendations
- When to provide colleges with optional essays and peer evaluations
- The ten common myths and misconceptions of the on-campus interview
- The most meaningful academic subjects, work experience, and extracurricular activities to mention
- Early action versus early

decision—the trade offs With this helpful, savvy book, prospective college students—and their parents and counselors—can now vastly improve their chances of getting into the college of their choice. “Want to scale the Ivy wall? Michele Hernández gives you the tools to do it. This brisk, no-nonsense book is built on inside dope, and Hernández’s experience allows her to challenge conventional admissions thinking.”

—HARRY BAULD Author of *On Writing the College Application Essay*

"The economics of American higher education are driven by one key factor--the availability of students willing to pay tuition--and many related factors that determine what schools they attend. By digging into the data, economist Nathan Grawe has created probability models for predicting college attendance. What he sees are alarming events on the horizon that every college and university needs to understand. Overall, he spots demographic patterns that are tilting the US population toward the Hispanic southwest. Moreover, since 2007, fertility rates have fallen by 12 percent. Higher education analysts recognize the destabilizing potential of these trends. However, existing work fails to adjust headcounts for college attendance probabilities and makes no systematic attempt to distinguish demand by institution type. This book analyzes demand forecasts by institution type and rank, disaggregating by demographic groups. Its findings often contradict the dominant narrative: while many schools face painful contractions, demand for elite schools is expected to grow by 15+ percent. Geographic and racial profiles will shift only slightly--and attendance by Asians, not Hispanics, will grow most. Grawe also use the model to consider possible changes in institutional recruitment strategies and government policies. These "what if" analyses show that even aggressive innovation is unlikely to overcome trends toward larger gaps across racial, family income, and parent education groups. Aimed at administrators and trustees with responsibility for decisions ranging from admissions to student support to tenure practices to facilities construction, this book offers data to inform decision-making--decisions that will determine institutional success in meeting demographic challenges"-- This alternative college guide from a former Dartmouth assistant admissions director-turned-consultant gives non-straight-A students advice on the many options

available to them and tips on how to identify, gain admittance to, and pay for the schools that will allow them to flourish. Less-than-perfect grades? No problem! Contrary to popular opinion, you don't need to have a 4.0 GPA or a perfect jump shot to get into a good college. This insider's guide reveals easy tweaks that will pay off big-time in showing admissions officers that you as a whole—not just your SAT scores—are a perfect fit for their incoming class. With stellar advice on getting into schools that will allow you to thrive, this handbook reveals how to: Find great colleges that are a good match for your strengths (and will overlook less-relevant weaknesses) Painlessly beef up your application Tailor extracurriculars to showcase your uniqueness Make sure your recommendation letters emphasize the right qualities Write original essays that reveal traits beyond your transcript Make an impression on admissions officers and college interviewers Create an early-admissions strategy to increase your likelihood of acceptance Help your chances if you're deferred Get into brand-name schools through the side door Communicate about learning disabilities or special circumstances Get scholarship money based on attributes other than grades Customize your financial aid strategy **BONUS:** Includes an appendix of 130+ selective colleges to consider!
