Web Information Systems and Technologies Jun 24 2020 This book contains the thoroughly refereed and revised best papers from the 9th International Conference on Web Information Systems and Technologies, WEBIST 2013, held in Aachen, Germany, in May 2013, organized by the Institute for Systems and Technologies of Information, Control and Communication (INSTICC), and co-organized by the RWTH

Aachen University. The 15 papers presented in this book were carefully reviewed and selected from 143 submissions. The papers were selected from those with the best reviews also taking into account the quality of their presentation at the conference. The papers are grouped into parts on Internet technology, Web interfaces and applications, society, e-business and e-government, Web intelligence, and mobile information systems.

The Syntax of Spoken Indian English Feb 01 2021 This book offers an in-depth analysis of several features of spoken Indian English that are generally considered as 'typical', but have never before been studied empirically. Drawing on authentic spoken data from the International Corpus of English, Indian component, the book focuses on the domain of discourse organization and examines the form, function and distribution of invariant tags such as isn't it and no/na, non-initial existential there, focus markers only and itself, topicalization and left-dislocation. By focusing on multilingual speakers' interactions, the study demonstrates conclusively that spoken Indian English bears all the hallmarks of a vibrant contact language, testifying to a pan-South Asian 'grammar of culture' which becomes apparent in contact-

induced language change in spoken Indian English. The book will be highly relevant for anyone interested in postcolonial varieties of English, contact linguistics, standardization, and discourse-pragmatic sentence structure.

Wildlife Radio Tagging Sep 08 2021 This book is a general guide to radio tracking and activity monitoring with pulsed-signal radio tags. The most elementary tags are used to find the animal so that it can be watched, captured or monitored in other ways. Tags can also have their pulses modulated by a variety of simple sensor sub-circuits to telemeter temperature, posture, movement, compass orientation and other aspects of animal activity. The text follows a sequence designed to guide the novice user through all aspects of radio tagging from the planning of a project and the choice of equipment, through field techniques to data analysis. There are details on tag construction and mounting both externally and by implantation. This book will be invaluable to scientists in all branches of ecology and wildlife research, both in showing ways in which radio tagging can be of use and in giving practical details on how to use this technology.

Natural Language Processing Using Very Large Corpora Aug 27 2020 ABOUT THIS BOOK This book is intended for researchers who want to keep abreast of current developments in corpus-based natural language processing. It is not meant as an introduction to this field; for readers who

need one, several entry-level texts are available, including those of (Church and Mercer, 1993; Charniak, 1993; Jelinek, 1997). This book captures the essence of a series of highly successful work shops held in the last few years. The response in 1993 to the initial Workshop on Very Large Corpora (Columbus, Ohio) was so enthusiastic that we were encouraged to make it an annual event. The following year, we staged the Second Workshop on Very Large Corpora in Kyoto. As a way of managing these annual workshops, we then decided to register a special interest group called SIGDAT with the Association for Computational Linguistics. The demand for international forums on corpus-based NLP has been expanding so rapidly that in 1995 SIGDAT was led to organize not only the Third Workshop on Very Large Corpora (Cambridge, Mass.) but also a complementary workshop entitled From Texts to Tags (Dublin). Obviously, the success of these workshops was in some measure a reflection of the growing popularity of corpus-based methods in the NLP community. But first and foremost, it was due to the fact that the work shops attracted so many high-quality papers. Data Analytics in Digital Humanities Apr 22 2020 This book covers computationally innovative methods and technologies including data collection and elicitation, data processing, data analysis, data visualizations, and data presentation. It explores how digital humanists have harnessed the hypersociality and social technologies, benefited from the open-source sharing not only of data but of code, and made technological capabilities a critical part of humanities work. Chapters are written by researchers from around the world, bringing perspectives from diverse fields and subject areas. The respective authors describe their work, their research, and their learning. Topics include semantic web for cultural heritage valorization, machine learning for parody detection by classification, psychological text analysis, crowdsourcing imagery coding in natural disasters, and creating inheritable digital codebooks. Designed for researchers and academics, this book is suitable for those interested in methodologies and analytics that can be applied in literature, history, philosophy, linguistics, and related disciplines. Professionals such as librarians, archivists, and historians will also find the content informative and instructive.

Exploring Identity Work in

Chinese Communication Dec 19 2019 There is growing acceptance among pragmatists that identity is often (de)constructed and negotiated in communication in order to impact the outcome of the interaction. Filling an important gap in current research, this book offers the first systematic, pragmatic theory to account for the generative mechanisms of identity in communication. Using data drawn from real-life communicative contexts in China, Xinren Chen examines why identity strategies are adopted, how and why identities are constructed and what factors determine their appropriateness and effectiveness. In answering these questions, this book argues that identity is an essential communicative resource, present across various domains and able to be exploited to facilitate the realization of communicative needs. Demonstrating that communication in Chinese involves the dynamic choice and shift of identity by discursive means, *Exploring Identity Work in Chinese Communication* suggests that identity is intersubjective in communication in all languages and that it can be accepted, challenged, or even deconstructed.

The Cambridge Handbook of English Corpus Linguistics Jul 18 2022 The Cambridge Handbook of English Corpus Linguistics (CHECL) surveys the breadth of corpus-based linguistic research on English, including chapters on collocations, phraseology, grammatical variation, historical change, and the description of registers and dialects. The most innovative aspects of the CHECL are its emphasis on critical discussion, its explicit evaluation of the state of the art in each sub-discipline, and the inclusion of empirical case studies. While each chapter includes a broad survey of previous research, the primary focus is on a detailed description of the most important corpus-based studies in this area, with discussion of what those studies found, and why they are important. Each chapter also includes a critical discussion of the corpus-based methods employed for research in this area, as well as an explicit summary of new findings and discoveries.

[Speech, Writing, and Thought Presentation in 19th-Century Narrative Fiction](#) Jul 06 2021

Reference to or quotation from someone's speech, thoughts, or writing is a key component of narrative. These reports further a narrative, make it more interesting, natural, and vivid, ask the reader to engage with it, and reflect historical cultural understandings of modes of discourse presentation. To a large extent, the way we perceive a story depends on the ways it presents discourse, and along with it, speech, writing, and thought. In this book, Beatrix Busse investigates speech, writing, and thought presentation in a corpus of 19th-century narrative fiction including *Frankenstein*, *Jane Eyre*, *Wuthering Heights*, *Oliver Twist*, and many others. At the intersection between corpus linguistics and stylistics, this book develops a new corpus-stylistic approach for systematically analyzing the different narrative strategies of discourse presentation in key

pieces of 19th-century narrative fiction. *Speech, Writing, and Thought Presentation in 19th-Century Narrative Fiction* identifies diachronic patterns as well as unique authorial styles, and places them within their cultural-historical context. It also suggests ways for automatically identifying forms of discourse presentation, and shows that the presentation of characters' minds reflects an ideological as well as an epistemological concern about what cannot be reported, portrayed, or narrated. Through insightful interdisciplinary analysis, Busse demonstrates that discourse presentation fulfills the function of prospection and encapsulation, marks narrative progression, and shapes readers' expectations.

The SGML Implementation Guide Oct 21 2022 Foreword-----

----- SGML is misunderstood and underestimated. I have always wanted to write this book. I am pleased that two people with whom I have had the pleasure to work were finally able to do so. Since I have always been a bit of an evangelist, I feel pride when my "students" become recognized "teachers". In the early years of SGML we struggled to define a language that would bring the information to its rightful place. We succeeded. Then we had to explain these ideas to technical adopters. Again, I think we have succeeded. We

have learned much about SGML in the process of implementing it. These experiences must now also be shared, along with comprehensible information on the language itself. The word must move out of the lab and the computer center and reach the business people, the users, the movers and shakers. The next generation will do things with SGML that we can't even imagine yet- it is that versatile.
