Evaluating Literacy Instruction Oct 24 2022 This must-read book for all literacy educators illuminates the intersection of research on literacy instruction and teacher evaluation. Since 2009, 46 states have changed or revised policies related to evaluating teachers and school leaders. In order for these new policies to be used to support and develop effective literacy instruction, resources are needed that connect the best of what is known about teaching literacy with current evaluation policies and support practices. A major contribution to meeting this need, the volume brings together a range of perspectives on tools, systems, and policies for the evaluation of teaching, organized into two sections:

- Crafting Systems and Policies for Evaluating Literacy Instruction
- Examples of Alternative Systems/Approaches for Evaluating Literacy Instruction

Across the text, expert scholars in the field emphasize the need for literacy professionals to do more than merely apply generic observation instruments for teacher evaluation, but also to consider how these tools reflect professional values, how elements of effective literacy instruction can be unearthed or included within them, and how teacher evaluation systems and policies can be used to increase students' opportunities to develop literacy.

Developing Adolescent Literacy in the Online Classroom Apr 06 2021 Recipient of the 2021 Divergent Book Award for Excellence in 21st Century Literacies Research given by the Initiative for 21st Century Literacies Research Today's secondary virtual teachers are tasked with designing and implementing effective literacy instructional approaches for adolescent online learners. Neglecting to consider the magnitude of possessing literacy skills needed in today's world and not teaching literacy effectively may lead to challenges for students in school and beyond. For most educators, one's toolbox of literacy instructional strategies center around approaches intended for the traditional brick-and-mortar classroom. But methods of reading and writing within the online classroom differ from those within the traditional school setting. Though online students are often separated by time and space, it's entirely possible for virtual teachers to utilize literacy strategies that actively entice and encourage student learning and engagement. This text provides virtual teachers a variety of strategies for translating traditional literacy instruction and assessment into the online classroom.

Effective Literacy Instructional Strategies for Use by General Education Teachers with Students on the Autism Spectrum Jun 08 2021 This thesis project is a Professional Development Project used to complete a review of literature about what are effective literacy strategies for general education teachers to use when teaching students on the Autism Spectrum, literacy instruction. The researcher took a personal interest in this topic based on her own teaching experience of students on the Autism Spectrum. The most appropriate way to address this question was to complete an exhaustive literature review and synthesis. After a synthesis of the research was completed, four significant findings were produced. The first finding is that according to research, five instructional strategies produce effective results on literacy instruction with students with ASD. The second finding is at the middle school and high school level, comprehension is the area of literacy instruction where most instructional strategies are being applied. The third finding is that the instructional strategy of cooperative learning groups are most effective with students with ASD at the elementary level. The fourth finding is that the most effective instructional strategies can be applied across all three grade levels of elementary, middle school and adolescents: direct instruction (DI) and Class Wide Peer Tutoring (CWPT). These findings are pertinent to the professional development of general elementary teachers with students on the Autism spectrum and will be shared with them through a professional development project in the form of a handout. Preparing Teachers for Effective Literacy Instruction in the Elementary Grades: Two-year Teacher Preparation Programs in Ontario May 27 2020 Research evidence suggests that quality teacher preparation sets beginning teachers on the right track for effectively teaching literacy. Given that most of the research has been conducted in the United States, there is a shortage of knowledge of the impact of teacher preparation for elementary literacy instruction in Canada. Similarly, little is known about the effect of program length and structure on graduates' knowledge and skills. This thesis contains two studies aimed at addressing these gaps in the literature in the Ontario context. The majority of teacher preparation programs in Ontario are completed in one year, with the exception of 2 two-year teacher preparation programs. Study 1 is an exploratory investigation comparing the survey responses of 38 graduates from two-year programs with the responses of a matched sample of graduates from one-year programs on items related to their preparation for elementary literacy instruction. Paired-sample t-tests revealed that graduates from two-year programs reported spending significantly more time discussing literacy-related issues, had better knowledge of key literacy terms, felt better prepared for literacy instruction and were more likely to include evidence-based components as part of their literacy program. Study 2 is a qualitative investigation of two-year teacher preparation programs with a focus on literacy instruction. Thirty-eight graduates from both two-year programs in Ontario completed a survey. Ten of these graduates also completed an interview. Following a modified Grounded Theory approach, Study 2 presents a detailed analysis of two-year programs in Ontario including: a) the range of content regarding literacy instruction; b) the correspondence between the content and the evidence-based knowledge of effective literacy instruction; c) graduates' knowledge base and skills for literacy instruction; and d) their feelings of preparedness. From a socio-cultural perspective, Study 2 also explored the processes and contexts that influence graduates' formation as literacy instructors. The findings served as the basis for proposing a model for teacher preparation that encompasses the processes and contexts that mediate pre-service teachers' development as literacy instructors. The proposed model outlines the necessary components to effectively prepare prospective teachers, based on scientific evidence, to ensure that all children learn to read and write.

Implementation of Effective Literacy Instruction Through a Balanced Literacy Approach Sep 23 2022 The purpose of this study was to examine early elementary teachers' implementation of balanced literacy instruction within Brigham Young University School of Partnership. In addition, the study evaluated how this instruction varied according to the teachers' classroom experience, educational level, and grade level. Five hundred teachers teaching from kindergarten to sixth grade from Jordan and Nebo School Districts completed a questionnaire. Results from this study indicate that balanced literacy instruction occurs regularly in the elementary classroom. Also, teachers reported using varied types of strategies when teaching balanced literacy routines. In addition, teachers' characteristics (i.e., years of experience and grade level taught) influenced the implementation of strategies in the classroom.

Effective Literacy Instruction Strategies Among Teachers in Elementary, Middle, and Secondary Grade Ranges Jan 23 2020 Author's abstract: Many studies have been completed to identify the most Effective strategies used by successful teachers. Research has determined some of the most valuable classroom practices to increase student achievement in the areas of Reading and Writing. These studies and research tend to isolate grade levels and specific areas of Literacy Instruction to vocabulary, comprehension, phonics, phonemic awareness, fluency, or writing. Using the theoretical framework of Critical Theory and the instructional implications from John Dewey, Louise Rosenblatt, Paulo Freire, Lev Vygotsky, and M.M. Bahktin, this study proceeded with a concentration on Critical Literacy through student experiences, text interactions, cultural perspectives, individual interests, critical inquiry, and dialogue among students as well as texts. The purpose of this study was to identify instructional strategies and/or practices of Effective Literacy Teachers from multiple grade ranges. Once Effective teachers of literacy were identified by multiple quantitative and qualitative measures, interviews and observations were used to talk with teacher participants and identify specific methods of Literacy Instruction that were evident across Effective teachers of elementary, middle, and high school age ranges. Motivation and engagement of students, acknowledgement of student differences, and direct instruction of specific skills in literacy are all indicators of Effective instructional practices presented through research as well as denoted through observational and interview responses from teacher participants. Most of the participants indicated that they did not believe student success could be attributed to one strategy or a single instructional practice used regularly in their classrooms. They felt it was a combination of strategies that target student needs, experiences, and varying interest levels. When looking through the observations and interview responses, the variety and integration of strategies is supported by the frequency teachers discussed them as well as the numerous strategies observed in the classrooms. The teachers who participated in this study provided evidence of instructional strategies centered on student interests and lives from which to build meaningful opportunities and experiences that can help guide genuine learning.

Improving Adult Literacy Instruction Dec 14 2021 More than an estimated 90 million adults in the United States lack the literacy skills needed for fully productive and secure lives. The effects of this shortfall are many: Adults with low literacy have lower rates of participation in the labor force and lower earnings when they do have jobs, for example. They are less able to understand and use health information. And they are less likely to read to their children, which may slow their children's own literacy development. At the request of the U.S. Department of Education, the National Research Council convened a committee of experts from many disciplines to synthesize research on literacy and learning in order to improve instruction for those served in adult education in the U.S. The committee's report, *Improving Adult Literacy Instruction: Options for Practice and Research*, recommends a program of research and innovation to gain a better understanding of adult literacy learners, improve instruction, and create the supports adults need for learning and achievement. *Improving Adult Literacy Instruction: Developing Reading and Writing*, which is based on the report, presents an overview of what is known about how literacy develops the component skills of reading and writing, and the practices that are effective for developing them. It also describes principles of reading and writing instruction that can guide those who design and administer programs or courses to improve adult literacy skills. Although this is not intended as a "how to" manual for instructors, teachers may also find the information presented here to be helpful as they plan and deliver instruction.
