Nonpolypoid Colorectal Neoplasms in Inflammatory Bowel Disease, An Issue of Gastrointestinal Endoscopy Clinics, Canine and Feline Gastroenterology - E-Book
Intestinal Failure, An Issue of Gastroenterology Clinics of North America E- Book *Oxford Handbook of Gastrointestinal Nursing* **Endoscopic Ultrasound, an Issue of Gastrointestinal Endoscopy Clinics** **Medical and Surgical Management of Crohn's Disease, An Issue of Gastroenterology Clinics of North America, E-Book** *Management of GERD, An Issue of Gastrointestinal Endoscopy Clinics* *Pancreaticobiliary and Luminal Stents, an Issue of Gastrointestinal Endoscopy Clinics* *Gastric Cancer, an Issue of Gastrointestinal Endoscopy Clinics* *Simulators and Models for Training in Gastrointestinal Endoscopy, an Issue of Gastrointestinal Endoscopy Clinics* Gastrointestinal Neoplasms: Advances in Research and Treatment: 2011 Edition **Pediatric Endoscopy, An Issue of Gastrointestinal Endoscopy Clinics of North America, Upper Gastrointestinal Bleeding Management, An Issue of Gastrointestinal Endoscopy Clinics, Evaluation of the Small Bowel, An Issue of Gastrointestinal Endoscopy Clinics, E-Book** Progress in Endoscopic Ultrasonography, An Issue of Gastrointestinal Endoscopy Clinics, E-Book **Video Capsule Endoscopy, An Issue of Gastrointestinal Endoscopy Clinics, E-Book** Endoscopy in Inflammatory Bowel Disease, An Issue of Gastrointestinal Endoscopy Clinics of North America, Endoscopy in the Era of Antibiotic Resistant Bacteria, An Issue of Gastrointestinal Endoscopy Clinics *Advanced Imaging in Gastroenterology, An Issue of Gastrointestinal Endoscopy Clinics, Textbook of Gastroenterology* **Morson and Dawson's Gastrointestinal Pathology** WSAVA Gastrointestinal Standardization Group Supplement Issue *Gastrointestinal Endoscopy* **Gastrointestinal Pathology, An Issue of Surgical Pathology Clinics, E-Book** **Gastroenterology, An Issue of Physician Assistant Clinics, E-Book** Irritable Bowel Syndrome, An Issue of Gastroenterology Clinics - E-Book **Regulation of Gastrointestinal Mucosal Growth** **Gastrointestinal Motility** **Practical Gastroenterology** **Gastrointestinal Transplantation, an Issue of Gastroenterology Clinics of North America** **Gastrointestinal Bleeding** *Nutritional Management of Gastrointestinal Disease, An Issue of Gastroenterology Clinics of North America* **Problems of the Gastrointestinal Tract in Anesthesia, the Perioperative Period, and Intensive Care** Laboratory Monitoring of Gastrointestinal and Hepatobiliary Disease, An Issue of Gastroenterology Clinics of North America **Nutritional Management of Gastrointestinal Diseases, An Issue of Gastroenterology Clinics of North America** Textbook of Pediatric

Gastroenterology, Hepatology and Nutrition **Infections of the Gastrointestinal Tract**
Yamada's Handbook of Gastroenterology JGA Special Issue 2020 Gastroenterology

Textbook of Pediatric Gastroenterology, Hepatology and Nutrition Apr 25 2020 This textbook provides a comprehensive and state-of-the-art overview of the major issues specific to the field of pediatric gastroenterology, hepatology, and nutrition. The first part of the book, Gastroenterology and Nutrition, presents in a systematic way the overall scope of issues encountered by children (newborn to teenagers) suffering from disorders of the gastrointestinal tract, pancreas and/or presenting nutritional issues. These chapters are structured in logical sections to facilitate consultation and include major topics ranging from congenital disorders to gastrointestinal problems of the newborn, infectious diseases of the gastrointestinal tract, and approach to nutritional problems in the various pediatric ages. The second part of the book, Hepatology, is articulated in a series of chapters which present a comprehensive review of congenital and acquired disorders of the biliary tract and liver. This section also includes a critical analysis of available diagnostic and therapeutic procedures and future perspectives. Written by experts in the field, Textbook of Pediatric Gastroenterology, Hepatology and Nutrition: A Comprehensive Guide to Practice constitutes a much needed, innovative resource combining updated, reliable and comprehensive information with agile consultation for a streamlined approach to the care of children with such disorders.

Laboratory Monitoring of Gastrointestinal and Hepatobiliary Disease, An Issue of Gastroenterology Clinics of North America Jun 27 2020 In consultation with Consulting Editor, Dr. Alan Buchman, Dr. Stanley J. Naides has put together a state-of-the-art issue of the Gastroenterology Clinics of North America devoted to Laboratory Monitoring of Gastrointestinal and Hepatobiliary Disease. Clinical review articles from expert authors are specifically devoted to the following: Inborn Errors of Metabolism and the GI track; Primary Immunodeficiency and the gut; Liver fibrosis determination; IBD; Autoimmune liver disease diagnosis and classification; Laboratory Diagnosis of Viral hepatitis; IgG4-RD with Emphasis on its GI Manifestation; Bowel Microbiome in Health and Disease; AAV System; and Celiac Disease. Readers will come away with the latest information they need to diagnose and monitor patients with gastrointestinal and hepatobiliary disease.

Gastrointestinal Transplantation, an Issue of Gastroenterology Clinics of North America Nov 01 2020 The Guest Editors have put together a concise monograph on the latest advances in transplantation of the liver, intestine, and pancreas. Expert authors have written comprehensive reviews on the following topics: Living donor liver transplantation: Technical innovations; Liver transplantation for cholangiocarcinoma; Immunological monitoring to personalize immunosuppression after liver transplantation; Status of adult LDLT in US based on A2ALL; Pediatric liver transplantation; Modern treatment of fulminant liver failure; Intestinal failure and rehabilitation; Adult intestinal transplantation; Pediatric intestinal transplantation; Living donor intestinal transplantation; Endoscopic follow-up of intestinal transplant recipients; Multivisceral transplantation; Pancreas transplantation for DM1 and DM2; and Robotic pancreas transplantation. Readers will come away with the clinical information they need to stay current on issues surrounding gastrointestinal transplantations.

Gastrointestinal Pathology, An Issue of Surgical Pathology Clinics, E-Book May 07

2021 This issue of Surgical Pathology Clinics, guest edited by Dr. Raul Gonzalez, will cover key topics in Gastrointestinal Pathology. This issue is one of four selected each year by our series consulting editor, Dr. Jason L. Hornick. Topics discussed in this issue will include: Grossing of Gastrointestinal Specimens: Best Practices and Current Controversies, Subspecialty Signout and Interobserver Variability in Gastrointestinal Pathology, Diagnosis and Management of Gastrointestinal Neuroendocrine Neoplasms, Daily Dilemmas in Pediatric Gastrointestinal Pathology, Upper Gastrointestinal Tract Manifestations of Inflammatory Bowel Disease, Gastric Polyps, Approaches to Biopsy and Resection Specimens of the Ampulla, Updates in Appendix Pathology, HER2 in Colorectal Carcinoma, Histology of Colorectal Carcinoma: Proven and Purported Prognostic Factors, Diagnoses and Difficulties in Mesenteric Pathology, Advances and Annoyances in Anus Pathology, among others.

Pediatric Endoscopy, An Issue of Gastrointestinal Endoscopy Clinics of North

America, May 19 2022 Over a short few decades, the field of pediatric endoscopy has matured from the exploratory to the routine. Performance of endoscopic procedures in children is now a fundamental aspect of the practice of more than 2000 pediatric gastroenterologists in North America, and endoscopic instruments are increasingly being developed with an eye to their pediatric applications. Ensuring safe and effective endoscopy in children requires specific medical knowledge and technical competency, in addition to appropriately designed equipment and settings. Obtaining consent from parents, as well as assent from patients, for the purposes of performing diagnostic and therapeutic gastrointestinal procedures begins with a deep understanding of risks and benefits that endoscopy affords and is typically gained through formal training in the field. Diagnostic endoscopy may help to confirm common pediatric conditions including eosinophilic esophagitis and inflammatory bowel disease, while therapeutic procedures to treat strictures in the GI tract may help children avoid more invasive surgeries. Using endoscopy in children to achieve hemostasis or to remove commonly swallowed foreign bodies, such as lithium batteries or high-powered magnets, can be lifesaving, and the insertion of feeding tubes can help medically complex patients to thrive. In short, pediatric endoscopy is an integral component of healthcare for children, and gaining and understanding of its best practices may help all clinicians to better recognize its role in pediatric disease outcomes.

Gastrointestinal Motility Jan 03 2021 Gastrointestinal motility has evolved from an esoteric laboratory tool into a sophisticated diagnostic technique that is now widely used clinically to guide in management of complex gastrointestinal problems. Today, it is the most rapidly growing subspecialty within gastroenterology. Previously, many of the gastrointestinal motility problems were either ignored or attributed to a disturbance of "psyche." But with the growing knowledge and understanding of how a dysfunction of the gastrointestinal muscle and nerves can cause disease, we are at the threshold of a revolution in our approach to the diagnosis and treatment of gastrointestinal motility disorders. The purpose of this book is to serve as a useful, up-to-date reference manual and guide for the diagnostic and therapeutic approach towards common adult and pediatric gastrointestinal motility problems. In order to enhance the understanding of these disorders, a problem-oriented approach has been chosen, and wherever possible the authors have provided clinical case scenarios to illustrate their message. The emphasis has been on how to

diagnose and treat motility disorders rather than to provide an encyclopedic information. The reference list at the end of each chapter should enable the enthusiast to seek further information. Some of the material presented in this book has been derived from the proceedings of the annual University of Iowa College of Medicine GI Motility Symposia.

Infections of the Gastrointestinal Tract Mar 25 2020 This updated second edition examines the gastrointestinal tract in relation to both immunocompetent and immunocompromised hosts. Written by specialists in infectious diseases and gastroenterology, this edition features discussion on the many infections of the gastrointestinal tract faced by adult and pediatric populations. The text traces the historical and epidemiological aspects of these disorders and provides detailed discussions on diagnosis, treatment, prevention and control, and should be of interest to the infectious disease specialist, gastroenterologist, primary care provider, internist, paediatrician and surgeon.

Medical and Surgical Management of Crohn's Disease, An Issue of Gastroenterology Clinics of North America, E-Book Nov 25 2022 Medical and Surgical Management of Crohn's Disease, An Issue of Gastroenterology Clinics of North America, E-Book

Advanced Imaging in Gastroenterology, An Issue of Gastrointestinal Endoscopy Clinics, Oct 12 2021 This issue presents a concise clinical overview on the most current knowledge on advanced imaging modalities. Dr. Ananadasabapathy has secured internationally recognized authors to write articles on endomicroscopy, molecular imaging, optical coherence tomography, and chromoendoscopy. Articles are also devoted to imaging the biliary tree and red flag technologies in gastric neoplasia.

Gastrointestinal Bleeding Sep 30 2020 There have been many advances in the management of this condition since the first edition of Gastrointestinal Bleeding. This new edition, thoroughly revised and restructured, includes the latest updates on all areas of the field of GI Bleeding, systematically covering all the areas of the GI tract, from upper GI to lower GI, through to small bowel bleeding. It fully covers the different types of bleeding that can occur, from peptic ulcer through to variceal bleeding and looks at new developments and pioneering techniques in the field, including endoscopy and balloon-enteroscopy. A methodology section describes the latest design of clinical trials in GI bleeding and this edition now highlights the new guidelines on UGIB (Upper gastrointestinal bleeding). This new edition of Gastrointestinal Bleeding is an invaluable purchase for all gastroenterologists, both in training and fully qualified.

WSAVA Gastrointestinal Standardization Group Supplement Issue Jul 09 2021

Evaluation of the Small Bowel, An Issue of Gastrointestinal Endoscopy Clinics, E-Book Mar 17 2022 Endoscopic access to the small bowel has advanced significantly since the introduction of video capsule endoscopy and deep enteroscopy in early 2000. Other major advances have occurred in imaging modalities involving computed tomography and magnetic resonance studies. Due to these advances, the recent 2015 ACG guideline changed the terminology from "obscure" to "small bowel bleeding" because the majority of cases now can be found to have a small bowel source. The improvements in technology have advanced our ability to visualize vascular findings, inflammatory lesions, and small bowel neoplasms. Articles in this issue are devoted to these improvements in technology.

Nonpolypoid Colorectal Neoplasms in Inflammatory Bowel Disease, An Issue of

Gastrointestinal Endoscopy Clinics, Apr 30 2023 Dr Roy Soetikno and Dr Tonya Kaltenbach are the editors for this issue of Gastrointestinal Endoscopy Clinics of North America, which is devoted to the improved detection and management of early neoplasia in inflammatory bowel disease. An important aspect of Dr Soetikno's outstanding career has been the bridging of endoscopic methods between Japan and the United States. Endoscopists in Japan have a better record of detecting subtle flat GI lesions. From the earliest days of endoscopy, it is fair to say that Japanese endoscopists have emphasized visual identification, analysis, and photo documentation of small GI lesions. The colon has been no exception. Dr Soetikno has incorporated these techniques, which have become increasingly feasible with steady improvement in modern digital endoscopes. Identifying small flat premalignant lesions and early cancers in patients with colitis can be lifesaving. Dr Soetikno and Dr Kaltenbach have edited an extraordinary issue of the Gastrointestinal Endoscopy Clinics of North America devoted to teaching and promulgating these methods, including an extensive photo atlas, which should be an invaluable resource for all academic specialists and practicing gastroenterologists.

Video Capsule Endoscopy, An Issue of Gastrointestinal Endoscopy Clinics, E-Book Jan 15 2022 Adoption of video capsule endoscopy has been slow, but there are now four FDA-approved devices and others available in China. It is now generally realized that there is an expanding role for these devices, not only in the small intestine but in the GI tract in general. In collaboration with Consulting Editor, Dr. Charles Lightdale, guest editor Dr. David Cave has assembled expert authors to provide clinical reviews that address where we are now, areas of controversy that still need resolution, and where the field is likely to develop over the next 5 to 10 years. Articles are specifically devoted to the following topics: Training, Reading and Reporting for Video Capsule Endoscopy; Indications and Contraindications: Complications of Capsule Endoscopy; Preparation, Prokinetics, and Surface Active Agents; Role of Capsule in Small Intestinal Bleeding; Role of Capsule Endoscopy in IBD; Role of Video Capsule Endoscopy in Liver Disease; Role of Video Capsule Endoscopy in Alternative Settings; Timing and Use of the Capsule Endoscopy in the Acute Care Setting; Role of Video Capsule Endoscopy as a Prelude to Deep Enteroscopy; Location of Capsule and Provocation Testing; Cost Effectiveness of Video Capsule Endoscopy; Artificial Intelligence in Capsule Endoscopy; and Novel Clinical Applications and Technical Developments in Video Capsule Endoscopy.

Yamada's Handbook of Gastroenterology Feb 22 2020 YAMADA'S Handbook of Gastroenterology The GI doctor's classic portable, clinically-focused and authoritative reference, revised and updated The revised and updated fourth edition of Yamada's Handbook of Gastroenterology focuses on the clinical aspects of patients presenting with gastrointestinal and liver disease. The book is a portable, quick reference tool designed to assist trainees and practicing gastroenterologists in the practical assessment and clinical management of patients. The Handbook is divided into two parts; the first is symptom focused and the second highlights diseases. Each chapter features key practice points, essentials of diagnosis, potential pitfalls and case studies. In addition, the book includes multiple choice questions and answers to enhance understanding. The fourth edition includes updated clinical practice guidelines from National Societies (American Gastroenterological Association, American Society for Gastrointestinal Endoscopy,

American Association for the Study of Liver Disease and American College of Gastroenterology). The new edition also offers many new photographs of endoscopic, radiographic and histopathologic images. This important resource: Contains both symptom- and disease-focused chapters, and covers all clinical conditions and symptoms likely to be encountered Presents case studies, practice points, essentials of diagnosis boxes, society guideline comparisons, and MCQs for self-assessment tailored to ABIM Board level Offers an abundance of management algorithms and flowcharts to help plot the best route for clinical care Includes a full-colour plate section Written for gastroenterology, hepatology and internal medicine specialists, Yamada's Handbook of Gastroenterology, Fourth Edition continues to offer a succinct guide for daily use on the wards and also as a resource for preparation for GI Boards and re-certification.

Irritable Bowel Syndrome, An Issue of Gastroenterology Clinics - E-Book Mar 05 2021

This comprehensive update on irritable bowel syndrome addresses both the state of art diagnosis and treatment as well as emerging therapies and future directions. Worldwide authority, Dr. Eammon Quigley, contributes an article on Therapies Aimed at the Gut Microflora and Inflammation. Other highlights include articles devoted to genetics, biomarkers, and symptom-based diagnostic criteria.

Endoscopy in Inflammatory Bowel Disease, An Issue of Gastrointestinal Endoscopy Clinics of North America, Dec 14 2021

The field of inflammatory bowel disease has evolved in many ways. The first has been the revolution in medical therapy for the disease. With the advent of biologic therapy, the aspirational goal of therapy has become mucosal healing. These medications have also made it possible to avoid or delay surgery for ulcerative colitis and Crohn's disease. Although non-invasive strategies such as MR or CT enterography or stool-based assays are helpful, they have not been able to replace the prognostic information provided by endoscopy. Simultaneously, the quality and spectrum of tools available to perform endoscopy has widened. High resolution endoscopes are now the norm and are nearly as good as chromoendoscopy for identifying dysplasia in ulcerative colitis patients. Most gastroenterologists also perform dilations but do not generally do this for patients with IBD. Finally, newer devices such as enteroscopes, endoscopic ultrasound, and endomicroscopes are being incorporated into the algorithms to diagnose and treat complications of IBD. This issue highlights all of these advances by the experts in their fields.

Endoscopy in the Era of Antibiotic Resistant Bacteria, An Issue of Gastrointestinal Endoscopy Clinics Nov 13 2021 Together with Consulting Editor Dr. Charles Lightdale, Dr. Jacques Van Dam has put together the first ever monograph that tackles the challenges of infection prevention by endoscopists and interventional endoscopists. Dr. Van Dam has selected authors who have learned valuable lessons in hospitals where antibiotic-resistant infections occurred as well as regulating bodies like the Food and Drug Administration (FDA) and the Centers for Disease Control and Prevention (CDC), who are trying to both resolve what happened and create, as much as possible, an evidenced-based response in an effort to protect the public. Articles are specifically devoted to the following topics:
Introduction to Transmission of Infection: Potential Agents Transmitted by Endoscopy;
Genetic Mutation and Natural Selection of Resistant Bacteria: How did We Get Here;
Nosocomial Infections: A History of Hospital-Acquired Infections; Endoscope as Vector for

Transmission Methods for Endoscope Reprocessing; Novel Algorithms for Reprocessing, Drying and Storing; Quality Systems Approach for Endoscope Reprocessing: You Don't Know What you Don't Know; Role of the FDA: From Device Regulation to Crisis Management; Hospital Outbreaks; Patient as Vector and Victim; Society Guidelines: Where is the Consensus; New-Age Antibiotics; Role of the CDC: From Hospital Outbreak to Crisis Management. Readers will come away with latest information they need to prevent infections in their endoscopy suites and hospitals.

Nutritional Management of Gastrointestinal Diseases, An Issue of Gastroenterology Clinics of North America May 27 2020 With collaboration of Consulting Editor, Dr. Alan Buchman, Guest Editors Drs. Gerard Mullen and Berkeley Limketkai have created a practical and current issue covering the breadth of topics in nutrition and gastrointestinal disease. Articles are specifically devoted to the following topics: Nutrition in the Management of Inflammatory Bowel Diseases; Irritable Bowel Syndrome: Food as a Friend or Foe; Treatment of Obesity: Beyond the Diet; Nutritional Management of Acute Pancreatitis; Nutritional Care in Patients with Intestinal Failure; The Life-long Role of Nutrition on the Gut Microbiome and Gastrointestinal Disease; Nutritional Strategies for Esophageal Disorders; Precision Medicine in Obesity; Gastrointestinal Food Allergies and Intolerances; All Things Gluten; Fish Oil for Inflammatory Bowel Disease: Panacea or Placebo; Nutrition Tools for the Practicing Gastroenterologist; Colorectal Cancer and Diet: Is Diet an Intervention; Non-Alcoholic Fatty Liver Disease: Nutritional Considerations; and Nutritional Considerations in the Hospital Setting. Readers will come away with current clinical information that they can employ in the clinical setting to improve outcomes in patients with gastrointestinal diseases.

Upper Gastrointestinal Bleeding Management, An Issue of Gastrointestinal Endoscopy Clinics, Apr 18 2022 Upper gastrointestinal bleeding is the leading emergency leading to hospitalization and urgent endoscopy. The field of gastrointestinal bleeding is rapidly evolving. The epidemiology is changing with more complex older patients on anticoagulant and antithrombotic agents presenting with upper gastrointestinal bleeding. The initial management has rapidly evolved with new transfusion thresholds, the use of risk stratification scores and no more nasogastric tubes. There is new data and recommendations on optimal timing of endoscopy. Medical therapies have also evolved with changes in proton pump inhibitor administration and the use of prokinetics to improve endoscopic visualization. Many modifications in endoscopic therapy have recently been advanced including the use of endoscopic ultrasound guided angiotherapy, topical sprays (i.e. Hemospray) and over-the-scope clips. In order to give optimal care to patients, it is critical that practicing gastroenterologists are aware of the many recent advances in management of patients with upper gastrointestinal bleeding.

Intestinal Failure, An Issue of Gastroenterology Clinics of North America E- Book Feb 28 2023 For this important and unique issue of Gastroenterology Clinics, Consulting Editor Dr. Alan Buchman decided to serve as co-Guest Editor with Dr. David Hackam to provide a “bench to bedside look at intestinal failure. Authors have contributed reviews on the status of the science behind artificial organs while emphasizing how to clinically prepare for intestinal failure. Articles are devoted to the following topics: Initial Evaluation and Care of the Patient with New Onset Intestinal Failure; Getting the Patient Ready for Home

Parenteral Nutrition; Pediatric Intestinal Failure: Etiology and Management; Predictors of Intestinal Adaptation in Children; Management of the Patient with Chronic Intestinal Pseudo-obstruction and Intestinal Failure; Intestinal Growth and Adaptation Following Resection in Intestinal Failure; Fluid and Electrolyte Management and Prevention of Dehydration in Intestinal Failure; The Oley Foundation and Consumer Support Groups; Weaning from Parenteral Nutrition; Hepatobiliary Complications of Intestinal Failure; Non-Transplant Surgery in Intestinal Failure; Indications for Intestinal Transplantation in Intestinal Failure; Intestinal Regeneration and the Artificial Gut; Bench to Bedside Approaches for Engineered Intestine, Esophagus and Colon; and Fetal and Amniotic Stem Cells in Gut Engineering. Readers will come away with a true state-of-the-art look at how to manage intestinal failure.

Gastroenterology, An Issue of Physician Assistant Clinics, E-Book Apr 06 2021 In this issue of Physician Assistant Clinics, Guest Editor Jennifer R. Eames brings her considerable expertise to the topic of Gastroenterology. Top experts in the field cover key topics such as Hepatitis C, Celiac Disease, Inflammatory Bowel Disease, Gastrointestinal Bleeding, and more. Provides in-depth, clinical reviews on Gastroenterology for PAs, providing actionable insights for clinical practice. Presents the latest information on this timely, focused topic under the leadership of experienced editors in the field; Authors synthesize and distill the latest research and practice guidelines to create these timely topic-based reviews. Contains 13 relevant, practice-oriented topics including Evaluating patients for Nutritional Deficiencies; Eosinophilic Esophagitis; Pathophysiology of Peptic Ulcer Disease; Updated Screening Strategies for Colorectal Cancer; and more.

Gastrointestinal Endoscopy Jun 08 2021 The 35 essays collected here report on many new diagnostic and therapeutic aspects of endoscopy. The topics covered include endoscopic ultrasonography, videoendoscopy, percutaneous endoscopic gastroscopy tube placement, hydrostatic dilators and overtubes. A special section is devoted to biliary stent, balloon dilation of biliary strictures, and nasobiliary drains. In addition, the various methods for achieving hemostasis in gastrointestinal bleeding are reviewed and an endoscopic videoquiz is provided.

Gastroenterology Dec 22 2019

Oxford Handbook of Gastrointestinal Nursing Jan 27 2023 "This practical guide to all aspects of gastrointestinal nursing covers the treatment of a wide range of patients - from those suffering from minor and acute disorders, through chronic conditions, to those requiring major surgery and treatment for malignant disease. It summarizes the current state of knowledge in gastrointestinal nursing and provides concise, user-friendly guidelines on the management and treatment of patients with gastrointestinal disorders." "Written by practising nurses and subject experts, and incorporating their years of experience, the Oxford Handbook of Gastrointestinal Nursing is a unique and invaluable companion for practising nurses, and for all health care professionals who are involved in the care of patients with gastrointestinal disorders."--BOOK JACKET.

Management of GERD, An Issue of Gastrointestinal Endoscopy Clinics Oct 24 2022 In consultation with Consulting Editor, Dr. Charles Lightdale, Dr. Kenneth Chang has assembled top authors to provide a current update on the management of GERD. Clinical review articles provide updates on the these important topics: Mechanism and

Pathophysiology of GERD; Personalized Approach in the work-up and management of GERD; Proton Pump Inhibitors; Radiofrequency Treatment for GERD; Trans-oral Incisionless Fundoplication (TIF); Innovations in Endoscopic Therapy for GERD; Laparoscopic Hernia Repair and Fundoplication, Failed Nissen; Laparoscopic Sphincter Augmentation (LINX); Refractory GERD and Functional Heartburn; and Extra-esophageal GERD and LPR. Readers will come away with the latest techniques and clinical applications to improve patient outcomes.

Gastric Cancer, an Issue of Gastrointestinal Endoscopy Clinics Aug 22 2022 In this issue of Gastrointestinal Endoscopy Clinics, guest editor Chin Hur brings considerable expertise to the topic of Gastric Cancer. Provides in-depth, clinical reviews on Gastric Cancer, providing actionable insights for clinical practice. Presents the latest information on this timely, focused topic under the leadership of experienced editors in the field; Authors synthesize and distill the latest research and practice guidelines to create these timely topic-based reviews.

Morson and Dawson's Gastrointestinal Pathology Aug 10 2021 Morson and Dawson's Gastrointestinal Pathology is one of the 'Gold Standards' of pathology textbooks. It has been completely revised to incorporate the latest advances in this rapidly evolving field including the developments in gastric cancer and *Helicobacter pylori* and the revised classification of other common gastrointestinal conditions. This new edition features a wealth of new material presented in full colour for the first time.

Regulation of Gastrointestinal Mucosal Growth Feb 04 2021 The mammalian gastrointestinal mucosa is a rapidly self-renewing tissue in the body, and its homeostasis is preserved through the strict regulation of epithelial cell proliferation, growth arrest, and apoptosis. The control of the growth of gastrointestinal mucosa is unique and, compared with most other tissue in the body, complex. Mucosal growth is regulated by the same hormones that alter metabolism in other tissues, but the gastrointestinal mucosa also responds to a host of events triggered by the ingestion and presence of food within the digestive tract. These gut hormones and peptides regulate the growth of the exocrine pancreas, gallbladder epithelium, and the mucosa of the oxyntic gland region of the stomach and the small and large intestines. Luminal factors (nutrients or other dietary factors, secretions, and microbes), which occur within the lumen and distribute over a proximal-to-distal gradient, are also crucial for the maintenance of the normal gut mucosal growth and could explain the villous height-crypt depth gradient and variety of adaptations since these factors are diluted, absorbed, and destroyed as they pass down the digestive tract. Recently, intestinal stem cells and polyamines are shown to play an important role in the regulation of gastrointestinal mucosal growth under physiological and various pathological conditions. In this chapter, we highlight key issues and factors that control gastrointestinal mucosal growth, with special emphasis on the mechanisms through which epithelial renewal is regulated by polyamines at the cellular and molecular levels. Table of Contents:

Introduction / Intestinal Architecture and Development / Characteristics of Gut Mucosal Growth / Intestinal Stem Cells / Role of GI Hormones on the Gut Mucosal Growth / Peptide Growth Factors in GI Mucosal Growth / Luminal Nutrients and Microbes in Gut Mucosal Growth / Polyamines in the Regulation of Mucosal Growth / Summary and Conclusions / Acknowledgments / References

JGA Special Issue 2020 Jan 23 2020 This special topic issue of 'Digestion' contains contributions discussing the subject in-depth. 'Digestion' is a well-respected, international peer-reviewed journal in gastroenterology. Special topic issues are included in the subscription.

Endoscopic Ultrasound, an Issue of Gastrointestinal Endoscopy Clinics Dec 26 2022 Endoscopic ultrasound (EUS) is the state-of-the-art evaluation for diagnosis and treatment of digestive system cancers/tumors and disorders involving the pancreas, bile duct, gallbladder, esophagus, stomach, and colon/rectum. This comprehensive issue addresses the basics of EUS, benign and malignant diseases, and therapeutic EUS.

Nutritional Management of Gastrointestinal Disease, An Issue of Gastroenterology Clinics of North America Aug 30 2020 Several new scientific developments in the area of nutrition and an increasing interest in the nutritional interventions in gastrointestinal diseases justify a timely issue on Nutritional Management of Gastrointestinal Disease. The articles in this issue are very relevant to our readers because diet and nutritional therapy positively affect various bodily functions, reduce the risk of disease progression, and optimize outcomes in patients with gastrointestinal disorders. Expert authors have written reviews devoted to the following topics: Malnutrition in GI disorders; Detection and nutritional assessment; Enteral feeding: Access and its complications; Parenteral nutrition: Indications, access and complications; Nutritional aspects of acute pancreatitis; Nutritional therapy in chronic pancreatic; Nutritional interventions in chronic intestinal pseudoobstruction and scleroderma; The role of diet in the treatment of irritable bowel syndrome; and Nutritional considerations in celiac disease and non-celiac gluten sensitivity. Readers will have a complete clinical understanding of best practices and outcomes for the gastroenterologist managing GI diseases.

Pancreaticobiliary and Luminal Stents, an Issue of Gastrointestinal Endoscopy Clinics Sep 23 2022 Dr. Baron has assembled experts in the use of expandable metal stents to provide comprehensive coverage of this topic. Articles are devoted to the use of expandable metal stents in biliary disease, esophageal disease, malignant esophageal disease, malignant biliary obstruction, as well as plastic stents and pancreatic stents. A foundation article on the principles of stents and tissue sampling is also included.

Practical Gastroenterology Dec 02 2020 Second edition of practical guide to gastroenterology. Fully revised with new topics added. Previous edition published in 2008.

Problems of the Gastrointestinal Tract in Anesthesia, the Perioperative Period, and Intensive Care Jul 29 2020 After a long period of neglect, the gastrointestinal tract is increasingly being recognized as an important target of anesthetics and anesthesia-related processes, as well as of conditions and treatments related to peri- and postoperative period and intensive care. Drugs used in anesthesia and intensive care and physiological or pathological changes in the perioperative period affect the digestive system in its function from the pharynx to the colon. Prolonged postoperative ileus or stasis of propulsive peristalsis in the critically ill or multiply injured patient may impair enteral nutrition and give rise to complications such as sepsis or multiple organ failure. In view of this new understanding of the clinical relevance of gut function, we felt that a book on problems of the gastrointestinal tract in anesthesia, the perioperative period, and intensive care was badly needed. The present volume is the product of an international symposium which

brought together physiologists, pharmacologists, experimental and clinical anesthetists, gastroenterologists, surgeons, and intensive care physicians to discuss all major contemporary aspects of bowel function in health and under the influence of anesthesia, surgery, and intensive care.

Canine and Feline Gastroenterology - E-Book Mar 29 2023 A comprehensive reference standard for the discipline, *Canine and Feline Gastroenterology* covers the biology, pathobiology, and diagnosis and treatment of diseases of the gastrointestinal, pancreatic, and hepatobiliary systems. An international team of experts, including 85 authors from 17 different countries, led by Robert Washabau and Michael Day, covers everything from minor problems such as adverse food reactions to debilitating inflammatory, infectious, metabolic, and neoplastic diseases of the digestive system. This authoritative text utilizes an evidence-based approach to reflect the latest science and research, complemented by principles of problem solving, algorithms to improve clinical diagnoses, and extensive full-color illustrations. For generalists and specialists alike, this gastroenterology reference should be part of every serious practitioner's professional library. A comprehensive, 928-page reference standard covers the discipline of canine and feline gastroenterology. An international focus is provided by 85 authors from 17 different countries, including renowned experts in veterinary gastroenterology, internal medicine, pathology, clinical pathology, radiology, and infectious disease. Coverage of the entire breadth and depth of gastroenterology ranges from biology to pathobiology, as well as diagnosis and treatment of diseases of the gastrointestinal, pancreatic, and hepatobiliary systems. Current information on GI microflora, immunology, cellular growth, and systems integration provides a foundation for treating clinical problems. Coverage of diseases in dogs and cats includes the oral cavity, esophagus, stomach, small intestine, large intestine, colon, anorectum, liver and biliary tract, exocrine pancreas, peritoneum, and associated vasculature. A focus on patient management examines the full range of procedures and techniques essential to diagnosis and treatment from clinical signs and diagnosis to nutritional support and pharmacologic management of disease. Clear explanations of current diagnostic modalities include laboratory tests, molecular methods, diagnostic imaging, endoscopy, and histopathology, also showing how to interpret and utilize results. A strong clinical approach emphasizes need-to-know information for managing the common and not-so-common G.I. clinical problems of everyday practice. Full-color photographs and illustrations depict concepts, conditions, and procedures. An evidence-based medicine perspective reflects the latest research as well as the modern practice of veterinary medicine. Logical, coherent, and consistent internal organization makes this a reader-friendly edition. Problem-based algorithms help in diagnosing every G.I. clinical problem from A to Z. A stand-alone section on the pharmacologic approach to G.I. disease offers quick and easy drug reference.

Textbook of Gastroenterology Sep 11 2021 Over the past twenty years, thousands of physicians have come to depend on Yamada's *Textbook of Gastroenterology*. Its encyclopaedic discussion of the basic science underlying gastrointestinal and liver diseases as well as the many diagnostic and therapeutic modalities available to the patients who suffer from them was—and still is—beyond compare. This new edition provides the latest information on current and projected uses of major technologies in the field and a new section on diseases of the liver. Plus, it comes with a fully searchable CD ROM of the entire

content.

Gastrointestinal Neoplasms: Advances in Research and Treatment: 2011 Edition Jun 20 2022 Gastrointestinal Neoplasms: Advances in Research and Treatment: 2011 Edition is a ScholarlyPaper™ that delivers timely, authoritative, and intensively focused information about Gastrointestinal Neoplasms in a compact format. The editors have built Gastrointestinal Neoplasms: Advances in Research and Treatment: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Gastrointestinal Neoplasms in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Gastrointestinal Neoplasms: Advances in Research and Treatment: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Simulators and Models for Training in Gastrointestinal Endoscopy, an Issue of Gastrointestinal Endoscopy Clinics Jul 21 2022 Devoted to simulation, this issue offers insights on the evolution of simulation in GI endoscopy and comparative overviews of the current state of the use of simulation in the aviation industry, driver's tests, and laparoscopic surgery. All of the major available types of simulators-ex-vivo, artificial tissue, and the computer simulators--will be described in detail, with an emphasis on what specific skills can be taught using each type. Also discussed are the optimal use of various simulators and models for EGD, Colonoscopy, ERCP, EUS, and hemostasis, with a focus on evidence-based validation data where available. Of great importance is the proper integration of various models at various stages of training and for different trainees; also discussed are the logistical obstacles to more widespread utilization of simulators and a look to the future, including the use of simulators for testing competency. This issue should be of great interest to students and teachers of endoscopy alike. It should also interest non-gastroenterologists who perform endoscopic procedures and individuals involved in supervising physician education and credentialing. Key words: simulators; endoscopy; colonoscopy; ERCP, EUS; hemostasis; virtual reality; ex-vivo models; competency; training; credentialing

Progress in Endoscopic Ultrasonography, An Issue of Gastrointestinal Endoscopy Clinics, E-Book Feb 16 2022 Dr. Gress has assembled top experts to discuss the latest advances of using endoscopic ultrasound for diagnostic and therapeutic purposes. The issue has review articles devoted to the following topics: EUS Elastography; Contrast-Enhanced EUS; New developments in EUS- FNA Tissue Acquisition; EUS FNA: Cytologic and histologic using new techniques for interpretation; New EUS Techniques for diagnosing pancreatic neoplasms; EUS for diagnosing and treating pancreatic cysts; The role of EUS in the diagnosis of Autoimmune Pancreatitis; Therapeutic EUS for cancer treatment; and EUS-guided techniques in biliary drainage, pancreatic drainage, necrosectomy, pelvic fluid collections, hemostasis techniques, and gastrojejunostomy. The issue ends with articles that look at training issues and the future of EUS. Readers should leave with the clinical information they need to embrace the latest advances of endoscopic ultrasonography.
