This study guide uses 275 multiple-choice and short-answer questions to test your knowledge of UCC Article 9 (as most recently revised by the so-called 2010 amendments) and its occasional intersection with other sources of law such as the Federal Tax Lien Act and the Bankruptcy Code. Each multiple-choice question is accompanied by a detailed answer that indicates which of four options is the best answer and explains why that option is better than the other three options. Each short-answer question (designed to be answered in no more than fifteen minutes) is followed by a thoughtful, yet brief, model answer. The questions are arranged by topic, and the study guide includes a "final exam." Q&A: Secured Transactions, Third Edition also includes a comprehensive topical index. While some people seem to have the natural ability to know what to study, how to absorb and retain information, and how to stay calm enough while actually taking a test to earn a great score, most of us find taking tests to be sheer misery. This is one of the most important chapters! Here you will find out: - How to Take a Test - The basics - In the Test Room - What you MUST do - Common Mistakes on a Test - And how to avoid them - Mental Prep - How to psych yourself up for a test Heard this Before? Maybe you feel you don't need it, and you are not sure if you are going to buy this book. Remember though, it only a few percentage points divide the PASS from the FAIL students. Even if our test tips increase your score by a few percentage points, isn't that worth it? Remember it only a few percentage points divide the PASS from the FAIL students. Why not do everything you can to increase your score? I have spent the better part of the last 53 years taking well over a thousand multiple choice tests. As a teenager, I struggled through high school. Armed with an average IQ and some fairly significant learning disabilities, I barely graduating with a 1.4 grade point average. However, I was smart enough to figure out early on that much of academics, and that achieving success in academics, had far more to do with the ability to master multiple choice tests than raw intellect. From there I began a 35 year study on the art and science of passing, mastering and scoring high on multiple choice tests. Despite a very substandard high school GPA, I scored high enough on the SAT and the ACT to be accepted to the University of Michigan, one of the top academic institutions in the Country. Upon graduation from college, I accepted a commission as an officer in the United States Marine Corps. As a Marine Officer, I completed dozens of military and civilian schools, including a Masters Degree from Boston University, and a Juris Doctor Degree from the University of Detroit School of Law. In fact, I earned a full ride military scholarship to law school based primarily on the fact I scored so highly on the Law School Aptitude Test (98th percentile). Upon completion of law school, I passed the Michigan Bar exam on the first attempt, scoring 149 points on the multistate (the multiple choice portion of the exam), which was one question away from automatic passage (at 150 they examiners do not need to grade the essay portion). I have also taken and applied many of the Marine Corps concepts of discipline and mental toughness to the art of preparing for, taking, and passing multiple choice tests. Resigning my commission and leaving the Marine Corps in 1990, I continued both my education as well as honing my test taking skills. I currently hold 12 professional licenses and 5 professional designations, which required me to pass several comprehensive and difficult multiple choice examinations. I have also attended dozens of professional test preparation courses. From those courses I have "cherry picked" all of the valuable lessons and test taking tips and have included those in this book. One of the professional licenses I hold is a paramedic license. As a paramedic I have gained a much greater understanding of the anatomy and physiology of test taking. Test taking is all about the central nervous system, which of course includes the brain. However, as I explain in this book, it is clear that the sympathetic and parasympathetic nervous systems have as much to do with passing and failing multiple choice tests as does the brain. Accordingly, I have also applied many of those principals in this book.
