The Canadian Bird Bander's Training Manual and the companion, The Instructor's Guide have been designed to complement each other. Both are the result of the collective work of many experienced banders and trainers from Long Point Bird Observatory. The motivating factors in the production of these manuals have been to ensure the safety and welfare of the birds involved in any banding project, as well as to ensure that banders gather accurate and complete data. This book documents some of the perceptions, strategies, and actions of natural resource agencies in the twenty-first century as they seek to respond to the changed reality influencing their policies and practices. It considers some of the responses in tools, techniques, and organizational change. As the Holocaust is memorialized worldwide through education programs and commemoration days, the common perception is that after survivors arrived and settled in their new homes they continued on a successful journey from rags to riches. While this story is comforting, a closer look at the experience of Holocaust survivors in North America shows it to be untrue. The arrival of tens of thousands of Jewish refugees was palpable in the streets of Montreal and their impact on the existing Jewish community is well-recognized. But what do we really know about how survivors' experienced their new community? Drawing on more than 60 interviews with survivors, hundreds of case files from Jewish Immigrant Aid Services, and other archival documents, The Montreal Shtetl presents a portrait of the daily struggles of Holocaust survivors who settled in Montreal, where they encountered difficulties with work, language, culture, health care, and a Jewish community that was not always welcoming to survivors. By reflecting on how

institutional supports, gender, and community relationships shaped the survivors' settlement experiences, Abramson and Lynch show the relevance of these stories to current state policies on refugee immigration.
